

# When to plant?

CAMBRIA STYLE

CREATING A BOUNTIFUL AND EFFICIENT VEGETABLE GARDEN TAKES A BIT OF ADVANCE PLANNING. Follow this calendar to get them most from the space you have. These dates are for the midwest of the United States; to find the best planting times for your own region—which may be significantly different—visit the website of your local Cooperative Extension System (*go to the USDA's website [www.csrees.usda.gov/Extension](http://www.csrees.usda.gov/Extension) and click on your state to find the correct Cooperative Extension System office*). And, for more information on planting and harvesting, visit the National Gardening Association's Food Gardening Guide at [www.garden.org/foodguide/browse/veggie](http://www.garden.org/foodguide/browse/veggie). **HAPPY GARDENING!**
